KENYA TEA INDUSTRY PERFORMANCE HIGHLIGHTS FOR
JULY 2019

PRODUCTION

Website: www.teaboard.or.ke

Tea production for the month of July 2019 decreased to 31.45 Million Kgs compared to 35.27 Million Kgs recorded during the corresponding month of 2018. Lower production was attributed to less precipitation recorded in the tea growing regions particularly in the West of Rift, consequent to which the region's output declined from 26.52 Million Kgs to 23.90 Million Kgs. Production within the East of Rift decreased marginally from 8.75 Million Kgs to 7.55 Million Kgs. Notably, owing to cold and wet weather conditions experienced in all tea growing areas, production for the month of July was however lower than that of June 2019, which stood at 42.42 Million Kgs. Across the sub-sectors, production within the Smallholder sub-sector recorded a marginal decline from 16.84 Million Kgs to 16.13 Million Kgs while that of the Plantation sub-sector decreased from 18.43 Million Kgs 15.32 Million Kgs.

Cumulative production for the period Jan-July was 8.34% lower to stand at 244.06 Million Kgs against 266.27 Million Kgs recorded during the corresponding period of 2018 owing to severe hot and dry weather conditions and late onset of the Long rains experienced during the first quarter of the year as well as depressed rainfall conditions during the month of April and May. West of Rift region was the most affected with output having dropped by 9.39%. The decline in the East of Rift over the seven months period was 6.26%.
